

Recommended Tape for Booths

When building and setting up booths at the International Centre, as the floors are concrete, many tape rolls will leave a heavy, sticky glue-like residue on the floors. After move-out this requires special chemicals and scrubbing to remove the debris before the flooring is machine cleaned for the next event.

In order to avoid this type of problem, we recommend using:

Scapa 174 Double-Sided Carpet Tape for tradeshow

Standard Roll is 1" x 33m.

It is widely available.

Anyone who lays down tape that leaves a glue/residue will be charged added manual labour to scrub the floors.

Thank you for your cooperation.
